

BHEEMA NITISH GURU DATHA

nitishbheema@gmail.com | +91-7780124320 | LinkedIn | GitHub | Portfolio

OBJECTIVE

Computer Science Engineering student with hands-on experience in backend development, database-driven systems, and scalable web applications. Skilled in Java, SQL, REST APIs, and problem solving through academic projects and virtual engineering simulations. Interested in software engineering, system design, and enterprise application development.

EDUCATION

B.Tech in Computer Science Engineering
Vel Tech University, Chennai

2023 – 2027
CGPA: 8.5

TECHNICAL SKILLS

- **Languages:** Java, Python, C, SQL, HTML, CSS, JavaScript
- **Tools & Technologies:** Git, GitHub, MySQL, Firebase, Spring Boot, Maven, Kafka
- **Concepts:** Data Structures, DBMS, REST APIs, OOPs, Web Development

PROJECTS

Finlytics: Personal Finance & Expense Tracker
Full Stack Web Application

2025

- Developed a web-based system for managing expenses, budgets, and financial tracking.
- Implemented expense categorization and transaction management features.
- Designed database structure for handling users and financial records efficiently.

TrackWise: Expense Management System
Database-Driven Web Application

2025

- Built a system with user authentication and transaction tracking features.
- Designed relational database models for users, categories, and payments.
- Focused on efficient database queries and backend workflow concepts.

Foodify: Online Food Ordering Website
Frontend Web Development

2025

- Developed responsive UI using HTML, CSS, and JavaScript.
- Implemented cart management and search filtering functionalities.

AI-Based RFID Smart Kitchen Management System
IoT + Web Integrated Project

2025

- Designed a smart system for ingredient validation and inventory tracking.
- Integrated RFID technology with real-time database synchronization.
- Built a supporting web interface for monitoring and management.

VIRTUAL EXPERIENCE

JPMorganChase Software Engineering Job Simulation – Forage

May 2026

- Integrated Kafka into a Spring Boot microservice for transaction message processing.
- Implemented transaction validation and persistence using Spring Data JPA and H2 database.
- Connected backend services with external REST APIs using RestTemplate.
- Developed REST endpoints for querying user balances and transaction workflows.
- Verified application behavior using Maven test suites and debugger-based testing.

CERTIFICATIONS

- Cyber Threat Intelligence using Splunk
- JPMorganChase Software Engineering Job Simulation – Forage (2026)
- Johnson & Johnson Robotics and Controls Job Simulation – Forage (2026)
- Tata GenAI Powered Data Analytics Job Simulation – Forage (2026)

ACHIEVEMENTS

- Maintained consistent academic performance with CGPA 8.5.
- Participated in college events as photographer and volunteer.

EXTRACURRICULAR ACTIVITIES

- Member of Photography and Arts & Drama Club.
- Worked as photographer and content creator during college events.

SOFT SKILLS

Problem Solving, Teamwork, Communication, Analytical Thinking, Time Management
